

# CRUCIAL DDR4 DESKTOP MEMORY

## Improve desktop performance quickly and easily

### Extend desktop life with more memory

There's an easy cure for slow workforce computers: more memory. Designed to help DDR4 systems run faster and smoother, Crucial® DDR4 Desktop Memory is one of the easiest and most affordable ways to improve system performance in the workplace. Load programs faster. Increase responsiveness. Run data-intensive applications with ease and increase desktop multitasking capabilities.

### Best For

PC upgrades

### Key Features

- 4GB, 8GB, 16GB, 32GB
- 2400MT/s, 2666MT/s, 3200MT/s
- Compatible with OEM systems
- 100% component and module tested for superior reliability
- Limited lifetime warranty<sup>1</sup>

## Make everything on workplace computers faster

Memory is a component in computers that enables short-term data access, which desktop systems rely on for moment-to-moment operations such as loading apps, browsing multiple tabs on the web, or editing a spreadsheet. Installing more memory in a slow workforce PC is the easiest way to improve system performance quickly.

## Multitask with ease

Members of your workforce are likely using their computers to do lots of things at once. From editing documents and reviewing presentations to creating spreadsheets and reports — all while having multiple tabs open on the internet — desktop tasks eat up RAM. This naturally leads to a performance problem: every app they run requires memory and competes for a limited pool of resources. Overcome this by installing high-density modules in each memory slot on your workforce desktops for seamless multitasking.

## Install with ease – no computer skills required

With just a screwdriver, an owner's manual, and a few minutes of time, anyone can install memory – no computer skills necessary. Just watch one of our three-minute install videos, and we'll walk you step-by-step through the process.

## Maximize the value of your workforce systems

At a fraction of the cost of a new system, a memory upgrade is one of the most affordable ways to increase performance. Get more out of your workforce desktops by giving them the resources they need to perform.

## The Micron difference – tested reliability you can trust

As the vertically integrated consumer brand of Micron, Crucial is trusted by millions for reliability, performance, and compatibility. Unlike module assemblers, we are a Micron brand, which means we have a deeper level of engineering collaboration to squeeze every ounce of performance from our products without compromising reliability. Our superior memory products are backed by a limited lifetime warranty<sup>1</sup>, training, documentation, and video assistance, customer support from an experienced sales network, and trusted pricing and inventory consistency. When it comes to memory, don't settle for less.

## Available parts

Crucial desktop memory is available for nearly every system. View our complete offering at [www.crucial.com](http://www.crucial.com).

Crucial® DDR4 Desktop Memory	
Density	4GB, 8GB, 16GB, 32GB
Speed	2400MT/s, 2666MT/s, 3200MT/s
Voltage	1.2V
Pin count	288-pin

1. Limited lifetime warranty valid everywhere except Germany, where warranty is valid for ten years from date of purchase.
